

Component Page Tabs

The pages in Query Manager enable you to tailor queries to retrieve data that is specific to your business needs. This table lists the name and purpose of the Query Manager pages.

Tab	Purpose	Required/Optional
Records	Select the records/tables to use in the query. You must select at least one record before you can create and save a query.	Required
Query	Select the fields you need for the query. You must select at least one record and field before you can create and save a query.	Required
Expressions	Create formulas to use with the query.	Optional
Prompts	Create runtime prompts.	Optional
Fields	View, edit, sort, and reorder fields that appear in the query.	Optional
Criteria	Filter data to retrieve only those rows that you need to see.	Optional
Having	Create criteria for fields that use aggregate functions.	Optional
Dependency		
Transformations		
View SQL	View the SQL that is generated when the query is created.	Optional
Run	View the results of the query.	Optional
